

RHAPSODY

Drive clinical & operational efficiency with Rhapsody

Realize ROI fast with scalable interoperability and trusted data

The Challenge for Ambulatory & Diagnostic Providers

Health IT leaders are under pressure to modernize infrastructure, execute major migrations, integrate new digital tools, and deliver outcomes – all while navigating tight budgets, talent shortages, and competing priorities. Aging integration infrastructure and poor data quality drives up costs, risk, and clinician friction.

The Rhapsody Advantage

reduce time to implement APIs and interfaces by 50%

save \$300k by simplifying tech stack

Migrate 155 integrations in 3 months

increase order volumes by 30%

cut integration development time by 75%

Achieve 98% patient record match rate and reduced duplicate resolution costs by 90%

Validated by Forrester

A commissioned Forrester TEI study of Rhapsody customers showed:

193% ROI over 3 years

<6 month payback period

\$2.5 million in resource savings

Increased clinician satisfaction from better data flow

Trusted by 1,900+ healthcare organizations

Rhapsody delivers a scalable platform purpose-built for healthcare that helps ambulatory teams connect systems, streamline data exchange, and spend more time focusing on care.

The platform behind your progress

Rhapsody is the trusted digital health enablement platform that helps ambulatory and diagnostic providers connect data, systems, and people—securely and at scale. Whether you’re navigating EHR transitions, onboarding new facilities, or implementing digital health apps, we give you the tools to do more with less.

DIGITAL HEALTH ENABLEMENT PLATFORM

A modern approach to securely connecting, moving, and standardizing healthcare data:

- Purpose-built for healthcare and future proof: seamless FHIR and API integration without compromising HL7
- Modular and composable architecture supports your organization’s growth
- Flexible deployment – on your infrastructure or ours
- Intuitive user experience, low/no-code workflows, and AI-powered automation
- Choose the operating model: self-managed or automated by Rhapsody
- Proven partner with 1,900+ healthcare orgs globally, HITRUST, ISO 27001 certified
