The Challenge for Health Tech Companies

Digital health teams are racing to meet provider demands, scale platforms, and stay compliant while managing limited technical resources. Slow integration, poor data quality, and internal engineering constraints can stall revenue, customer satisfaction, and innovation.

The Rhapsody Advantage for Health Tech and Digital Health:

Qventus | reduce customer onboarding time by 50%

Med USA | cut integration dev time by 90%

monogram health | freed Up $600K in Developer Capacity

SOPHiA GENETICS™ | faster TAT, increased accuracy, smarter rule-building

ZEPHYR AI | from data ingestion to AI modeling in less than 30 days

Validated ROI, backed by Forrester

A Forrester study of a fast-scaling health tech customer showed: **193% ROI over 3 years**

<6 month payback period

$2.5 Million in developer time saved

30% faster onboarding

Trusted by 200+ Digital Health Innovators

From AI-powered solutions to enterprise EHRs, virtual care platforms, and chronic care apps—Rhapsody powers the next generation of health tech.

Ready to Scale Smarter?

Let's talk about how Rhapsody can reduce your operational drag and unlock growth.

rhapsody.health
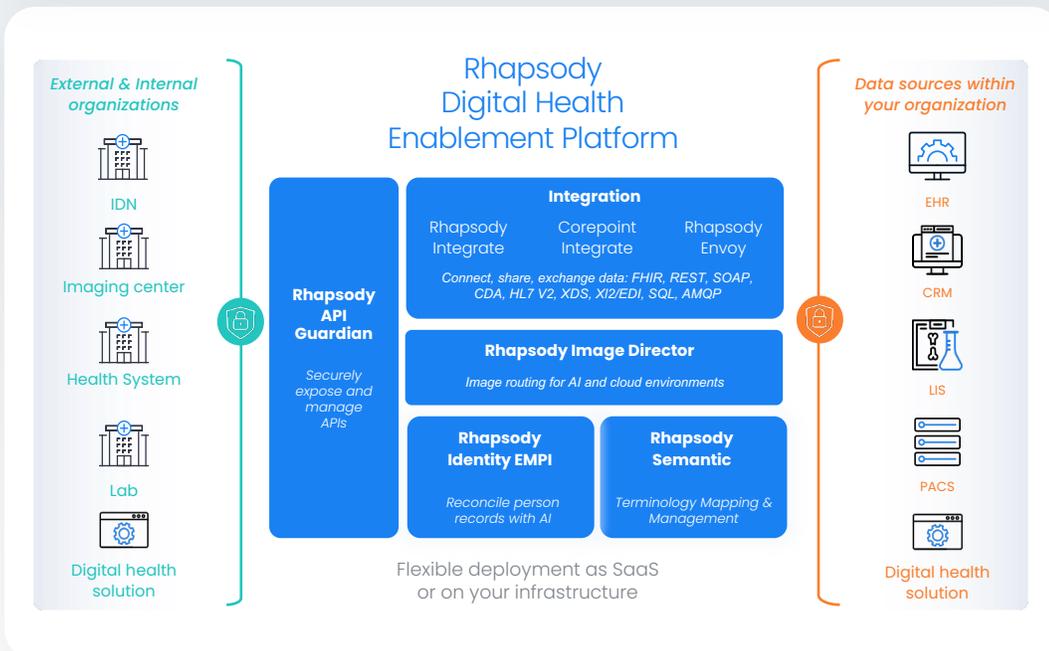

The platform behind your speed to market

Rhapsody is the trusted integration and data quality platform for digital health innovators.

We help health tech teams scale fast by simplifying EHR integration, accelerating access to multi-modal data, and ensuring it's ready for AI modeling and analytics. Whether you're onboarding your next provider customer, expanding into new markets, or maturing your data pipeline, Rhapsody delivers the foundation to move fast—with trust and control.

DIGITAL HEALTH ENABLEMENT PLATFORM

Purpose-built to scale your digital health product with clean, connected data:

- Designed for healthcare-first use cases, not retrofitted tools
- Modular and composable architecture supports your roadmap and team structure
- Flexible deployment – on your infrastructure or ours
- Choose the operating model: self-managed or delivered by Rhapsody
- Intuitive user experience, low/no-code workflows, and AI-powered automation
- Proven partner—1,900+ healthcare orgs globally, HITRUST, ISO 27001 certified

External & Internal organizations
- IDN
- Imaging center
- Health System
- Lab
- Digital health solution

Rhapsody Digital Health Enablement Platform

Rhapsody API Guardian

Securely expose and manage APIs

Integration

Rhapsody Integrate | Corepoint Integrate | Rhapsody Envoy

Connect, share, exchange data: FHIR, REST, SOAP, CDA, HL7 V2, XDS, XI2/EDI, SQL, AMQP

Rhapsody Image Director

Image routing for AI and cloud environments

Rhapsody Identity EMPI

Reconcile person records with AI

Rhapsody Semantic

Terminology Mapping & Management

Flexible deployment as SaaS or on your infrastructure

Data sources within your organization
- EHR
- CRM
- LIS
- PACS
- Digital health solution
